Erich Seamon and Associates LLC

Geographic Information Systems analysis development design

ESA Corporate Profile 2009

Headquartered in San Francisco, California, **Erich Seamon and Associates LLC (ESA)** (www.esatech.net) is a professional services technology firm with a focus on advanced technology systems for government. Founded in 2006 by its principal, Erich Seamon - ESA works under a model that brings together diverse, world - renowned experts in a multitude of disciplines, including government and utility management, strategic writing and planning, natural resources management, advanced programming and computer engineering, and project management. ESA's collaborative effort helps to provide an objective and unbiased perspective when working on difficult problems. Some examples include:

- Work-flow and business process system engineering;
- Geospatial data forensics, litigation support and expert witness testimony regarding geospatial information;
- Governmental systems design and implementation (assessment, taxation, public works, utility management);
- Enterprise GIS strategic planning, implementation and development;
- Crime analysis and crime management thru the use of GIS;
- Geographic address modeling and design;
- Technology patent review and examination;
- Social services research, analysis, and map services development for communities;
- Real estate management/analysis/demographics - via complex technology development;
- Expertise in environmental and conservation GIS projects - most notably in surficial processes (watershed management, surface-water hydrology).
